Local presence with international operating experience

AmWest Türkiye gives customers a locally established platform in Istanbul backed by decades of technical experience in aviation, fuels and complex overseas operations.

30+

years of fuels and aviation experience

50+

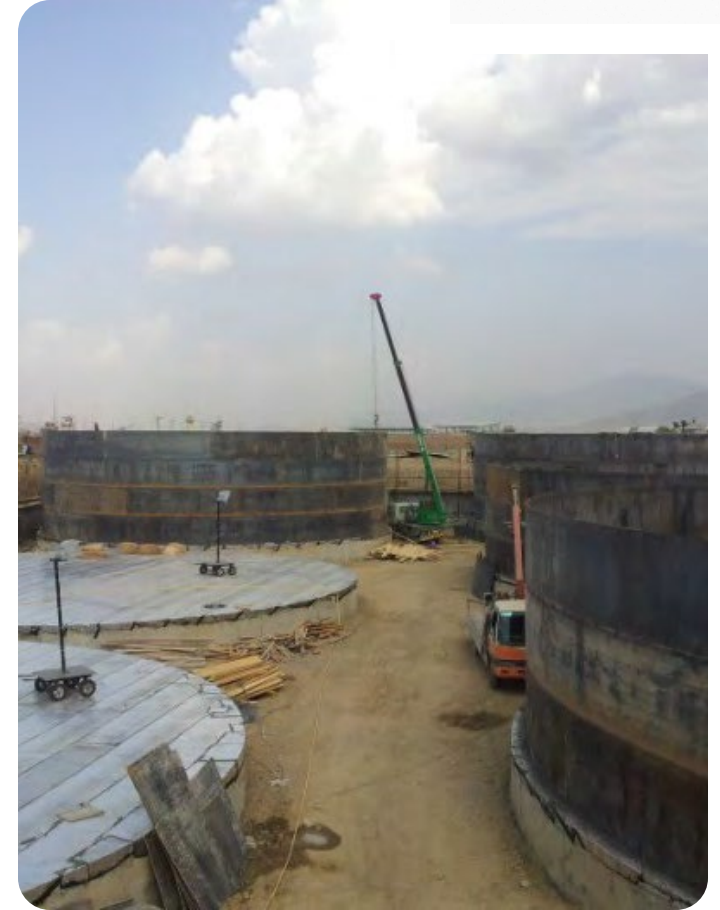

countries supported

12

fuel laboratories designed and outfitted

10

fuel storage facilities constructed

Core service portfolio

FUELS OPERATIONS

Storage, distribution, receipt, issue, accountability and operational readiness support.

QUALITY AND COMPLIANCE

Fuel quality control, laboratory operations, procedures, audits and corrective-action support.

TRAINING

Instructor-led aviation, fuels, safety and equipment training adapted to customer operations.

INSPECTIONS

Fuel storage, equipment and operational inspections with documented findings and recommendations.

PROJECT SUPPORT

Planning, mobilization, vendor coordination, project controls and field implementation.

TENDER SUPPORT

Technical responses, compliance reviews, costing inputs and local-market coordination.

Fuels operations and quality assurance

Operational support

- Fuel receipt, storage, handling and distribution
- Aircraft and ground refueling procedures
- Fuel accountability and inventory controls
- Spill prevention and emergency readiness

Quality and maintenance

- Sampling, testing and laboratory procedures
- Tank, pump, hose, filter and meter inspections
- Preventive maintenance and deficiency tracking
- Documentation aligned with contract requirements

Aviation and fuels training

Training built around the customer operating environment

- Aircraft refueling and ground handling
- Fuel quality surveillance and testing
- Tank and equipment inspection
- Aviation safety and human factors
- Environmental and spill-response practices
- Supervisor, operator and maintainer development

Inspection, audit and corrective-action support

AmWest combines field inspection with practical recovery planning. Findings are translated into prioritized actions, assigned responsibility and evidence of closure.

1

REVIEW

Requirements, procedures and prior records

2

INSPECT

Facilities, equipment and field practices

3

REPORT

Findings, risk ranking and supporting evidence

4

CORRECT

Root cause, corrective action and verification

Regional project and tender support

Before award

Opportunity review, technical solution development, local supplier coordination and pricing support.

Mobilization

Personnel, equipment, access, permits, schedules and reporting systems.

Performance

Daily coordination, quality control, risk management, documentation and customer communication.

Representative international experience

Military and government operations

Fueling, quality, account; safety and mission-support environments.

International training

Programs delivered for personnel supporting aviation and fuel operations in multiple countries.

Austere and remote locations

Field teams accustomed to limited infrastructure, changing requirements and local coordination.

Contractor support

Technical input, audits, procedures and recovery actions for prime and subcontract teams.

Why AmWest Türkiye

LOCAL ACCESS

Istanbul presence supports regional coordination and customer engagement.

TECHNICAL DEPTH

Senior fuels and aviation specialists bring direct field and management experience.

PRACTICAL DELIVERY

Solutions are written for implementation, inspection and sustained operations.

FLEXIBLE SUPPORT

Engagements can range from targeted audits and training to full project support.

LET'S DISCUSS YOUR REQUIREMENT

Technical services, training, inspection and project support from Istanbul to your operating location.
